

**METHOD OF ESTABLISHING A DATA MANAGEMENT FEE
STRUCTURE BASED ON FINE GRAINED DATA ENTITIES**

Systems, methods and articles of manufacture for accessing data for a fee are provided. Fee schedules are defined for any arbitrary granularity of data, including for fields and data structures (e.g., tables in a database). Fees may be calculated based on the type of operation to be performed. Fees may also be calculated per operation and/or per data item involved in the operation.
